

South Kohala Coastal Partnership Vision:

A restored, healthy, abundant, resilient South Kohala coastal system, cared for and cherished by an island community guided by the values and traditions of Kohala.

The partnership includes representatives from over 30 organizations, agencies, schools, resorts and community groups that are committed to achieving this vision.

Funding and coordination of these projects made possible by the following:

South Kohala District Island of Hawai'i

South Kohala Conservation Action Plan

Projects

The State's Hawaii Coral Reef Strategy identifies coral reef ecosystems along the South Kohala district coastline as a priority management site. The South Kohala Conservation Action Plan (SKCAP) identifies the priority threats, conservation targets and strategies. The SKCAP is the guiding document for the partnership.

The area of focus includes the marine and coastal habitats along 24 - miles from the north boundary of Kawaihau ahupua'a to the south end of Anaho'omalu Bay.

Projects include mauka (mountain) to makai (ocean) management strategies to help reduce the priority threats.

- Conservation targets:**
- Coastal and Marine Food Resources
 - Coastal Wetlands
 - Community Kinship and Stewardship
 - Coral Reef Ecosystems
 - Native Reef Herbivores
 - Native Reef Predators

- Priority threats:**
- Unsustainable Fishing Practices
 - Land Based Sources of Pollution
 - Invasive Species

- Conservation Strategies:**
- Community Partnerships
 - Community Co-managed Areas
 - Fisheries Management
 - Sediment Reduction
 - Invasive Species Removal & Prevention
 - Additional threat analysis

Understanding the Consequences of Land Based Pollutants on Coral Health in South Kohala
